

# Best Practices Of Entrepreneurship And The Endowment Of The Entrepreneurship Development Curriculum.

Rubeena Cetin\*

*Deriving from the practical experience of entrepreneurs in the method of a case study approach, wherein, indepth information related to entrepreneurial indulgence is analyzed to reformulate the understanding of entrepreneurship education. Practical opportunities related to entrepreneurial performances in terms of success and failure from these individuals are evaluated to define the norms and the nuances needed for an entrepreneurial education and a curriculum that can be devised which can address to the practical difficulties that an entrepreneur can face. Further, a survey from current students and graduates are analyzed to investigate whether these undergraduate graduates from various faculties are equipped with the necessary knowledge and information to be able to visualize for their future careers about entrepreneurship education in realizing in their careers.*
